RECORDED

A.D. 1853 N° 2268.

Brewing.

(This Invention did not proceed to the Great Seal.)

PROVISIONAL SPECIFICATION left by the said Daniel Towers Shears at the Office of the Commissioners of Patents, with his Petition, on the 4th October 1853.

I, DANIEL TOWERS SHEARS, of Bankside, Southwark, do hereby declare the nature of my Invention for "**IMPROVEMENTS IN BREWING**" to be as follows:—

5 Heretofore it has been for the most part usual to boil worts and hops in vessels subject to the pressure of the atmosphere, by which it is necessary to raise the worts to a comparatively high temperature. Now, my Invention consists of employing closed vessels combined with vacuum apparatus, so as to boil worts and hops at a comparatively low temperature; and it is preferred
10 that the heated steam or vapour from one vacuum boiler should be conveyed to and heat the worts and hops in another vacuum boiler.
